

Mini Bat 2

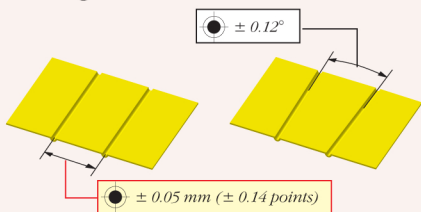

ENTRY LEVEL DIGITAL DIE-CREASING MACHINE

MINIBAT 2 is a compact machine to produce die-creases in programmed positions, with quality, accuracy and speed. MINIBAT 2 is the original true creaser and utilizes the rule and matrix method of creasing. This system has been traditionally used in die cutting machines, and is the only recognised method for creasing digitally printed stocks or for creasing cross grain. This machine is robust in construction and is ideally suited for commercial applications. Compared to any other machine of this type, MINIBAT 2 allows the highest creasing pressures and performances in speed and accuracy.

TECHNICAL FEATURES

- Max. size: cm 45 x 90 (17³/₄ x 35¹/₂ in.)
- Min. size: cm 15 x 20 (6 x 7³/₄ in.)
- Stock range: 80-600 gr. (4 – 30 points)
- Speed A4 1 creasing: 11.000 cp/h
- Creasing tolerance

OPTIONALS

Start/Stop circular perforation - Special creasing knife for digital printings
