Design

The Matrix Pneumatic can run up to twice the speed of our standard systems. Printers can laminate work even faster to get the job finished and back to the customer.

Pneumatic pressure rollers allow you to laminate certain substrates up to 50% quicker, saving both time and cost. The Matrix can be purchased as a complete system, or as a modular retrofit for the multilingual MX-370 and MX-530.

The Pneumatic option is produced in Britain which shortens our supply chains and lead times. We've used the highest quality components within the systems, including Omron switches, Schneider electrics and British built Bambi compressors.
